SUMMARY

Computer Science student with hands-on experience in full-stack web development, AI-integrated systems, and cloud-based applications. Strong background in C#, JavaScript, Python, and RESTful APIs, with proven ability to design scalable solutions through academic and independent projects. Demonstrated leadership skills from military command experience. Seeking a junior software or full-stack developer role in a technology-driven team where strong engineering and problem-solving skills can create impact.

SOFTWARE TOOLS & TECHNOLOGIES

- Programming Languages: C#, Java, JavaScript, Python, C, SQL, HTML5/CSS3.
- Frameworks & Libraries: ASP.NET Core Web API, React, Vite, Tailwind CSS, Bootstrap, Flask.
- Cloud & Databases: AWS (Lambda, IoT Core, Cognito), SQL Server, DynamoDB (NoSQL).
- Tools & Version Control: Git, GitHub, Azure Data Studio, MQTT Protocol.

Core Skills: Full-Stack Development, RESTful API Design, AI Integration (RAG, LLMs), Data Analysis

PROJECTS

COUNT - Premium Intimacy Journal & Private Network

- High-end mobile application featuring secure Firebase authentication, private encounter logging, and a proprietary algorithmic "Stud Score" for personalized intimacy analysis.
- Users can monitor real-time statistics via a dynamic dashboard, visualize trends through interactive animated SVG charts, and securely share view-once entries with native screenshot protection.
- Developed a discreet networking system with instant auto-burn mechanics, enabling encrypted peer-to-peer sharing and guaranteed data deletion for absolute user privacy.
- **Tech Stack**: React Native (Expo) and TypeScript frontend, Firebase Firestore & Authentication backend, React Native Skia and Reanimated for premium UI/UX micro-interactions.

FOR: Fit On Ring

- Premium Health Monitoring Ecosystem: A high-fidelity mobile application built with React Native (Expo SDK 52), delivering real-time biometric visualization through a custom-designed glassmorphism interface.
- Native Hardware Integration: Engineered a custom Expo module, ForRingSdk, to bridge the CRPSmartRing native SDK, enabling low-level communication and robust hardware control on both iOS (Swift) and Android (Kotlin).
- Advanced Data Synchronization: Implements a dual-phase protocol that prioritizes immediate 4-day sleep/activity data while background-syncing 7-day high-resolution telemetry, including HRV and heart rate.
- System Resilience & Fidelity: Features a multi-layered Watchdog Recovery system to mitigate SDK latency and a Sleep Fallback Engine that intelligently alternates between algorithms to ensure maximum data coverage.
- **Tech Stack**: React Native (Expo), Swift/Kotlin Native Modules, MongoDB Atlas (Time-series), Firebase Auth, and SVG-based charting.

Buddiz - P2P Craft Beer E-Commerce Platform

- Cloud-native web application featuring a seamless marketplace interface, secure user authentication via Cognito and robust serverless serverless payment integration.
- Users can browse a dynamic catalouge, secure payments via PayPal Live API, track real-time order status with animated updates and receive automated professional HTML invoices.
- Includes a comprehensive admin dashboard for product inventory management, order workflow control (Approve/Deny) and sales analytics.
- **Tech Stack:** React/Vite frontend, Node.js AWS Lambda Serverless backend, AWS API Gateway, DynamoDB NoSQL database, Amazon Cognito for identity, AWS SES for transactional emails and CloudFront CDN.

EDUCATION

B.Sc. in Computer Science *Ruppin Academic Center (Expected Completion: 2026)*

- Focus areas: Software Development, Cyber & Communications
- Key Courses: Data Structures, Web Programming, Software Engineering, Object-Oriented Design

High School Diploma *"Dror" High School, Bnei Dror*

MILITARY SERVICE

2018 – 2021 *Commander, Israel Defense Forces (IDF)*

- Commander in combat, led a 20-soldier unit through tactical operations and training under high-pressure conditions with discipline and precision.
