Full-stack developer with a B.Sc. in Computer Science and three production applications shipped end to end for paying clients, from architecture through cloud deployment. Strong in TypeScript, React and React Native, with hands-on AWS serverless experience across Lambda, API Gateway, Cognito and DynamoDB. Command experience in the IDF.

EXPERIENCE

RINGA - Hyper-Local Social Discovery App

Freelance Full-Stack Developer

2026 - Present

Independent client

- Real-time social platform matching users within a dynamic 75-200 m radius by proximity and interest.
- Architected a WebSocket messaging system with delayed-first-message logic and automatic chat expiry.
- Built Ghost Mode, geofenced Ghost Zones, Haversine proximity, a moderation pipeline, and Apple/Google SSO.

React Native (Expo) • Express.js/TypeScript • WebSocket • PostgreSQL/Drizzle • Google Cloud Storage

FOR: Fit On Ring - Smart Ring Health Platform

Freelance Full-Stack Developer

Feb - Jun 2026

Independent client

- Engineered ForRingSdk, a custom Expo module bridging the CRPSmartRing SDK across Swift and Kotlin.
- Designed a dual-phase sync protocol: immediate 4-day sleep data, background 7-day HRV telemetry.
- Built a Watchdog Recovery system for SDK latency and a Sleep Fallback Engine for data coverage.

React Native (Expo SDK 52) • Swift/Kotlin native modules • MongoDB Atlas • Firebase Auth

Buddiz - P2P Craft Beer Marketplace

Freelance Full-Stack Developer

Dec 2025 - Feb 2026

Independent client

- Cloud-native marketplace with Amazon Cognito authentication and serverless payment integration.
- Live PayPal payments, real-time order tracking, SES invoicing, and an admin dashboard for analytics.
