Nevo Iflah

Computer-Science Student | Full-Stack Developer

+972-50-7908555 | nevo.iflah6@gmail.com | linkedin.com/in/nevo-iflah | github.com/nevoiflah

SUMMARY

Computer Science student with hands-on experience in full-stack web development, AI-integrated systems, and cloud-based applications. Strong background in C#, JavaScript, Python, and RESTful APIs, with proven ability to design scalable solutions through academic and independent projects. Demonstrated leadership skills from military command experience. Seeking a junior software or full-stack developer role in a technology-driven team where strong engineering and problem-solving skills can create impact.

SOFTWARE TOOLS & TECHNOLOGIES

- Programming Languages: C#, Java, JavaScript, Python, C, SQL, HTML5/CSS3.
- Frameworks & Libraries: ASP.NET Core Web API, React, Vite, Tailwind CSS, Bootstrap, Flask.
- Cloud & Databases: AWS (Lambda, IoT Core, Cognito), SQL Server, DynamoDB (NoSQL).
- Tools & Version Control: Git, GitHub, Azure Data Studio, MQTT Protocol.

Core Skills: Full-Stack Development, RESTful API Design, AI Integration (RAG, LLMs), Data Analysis

PROJECTS

NewsHub- Personalized News & Community Portal

- *NewsHub*
- Full-stack web application featuring secure user authentication, personalized news feeds and AI-powered content analysis; summarization and sentiment.
- Users can browse global headlines, save articles for later, share news with community and engage through a tiered activity leveling system with likes, comments and followers.
- Developed an admin dashboard enabling real-time analytics, user management, and system monitoring.
- **Tech Stack:** HTML/JavaScript/Bootstrap frontend, C# ASP.NET Core Web API backend, SQL Server database with strictly enforced cascading data integrity.

Ruppin Academic Advisor- AI & Robotics Voice Interface

- Full-stack web application featuring a voice-driven interface, secure user authentication and AI-powered academic advising personalized for students and guests.
- Users can converse naturally using speech-to-text and text-to-speech, switching seamlessly between Hebrew and English and receive accurate institutional information via RAG (Retrieval-Augmented Generation).
- Developed an admin dashboard for user management, analytics and reviewing chat session histories to improve AI responses.
- **Tech Stack:** HTML/JavaScript/CSS3 frontend, C# ASP.NET Core Web API backend, Python Flask AI Microservice, SQL Server database with context-aware retrieval.

Buddiz - P2P Craft Beer E-Commerce Platform

- Cloud-native web application featuring a seamless marketplace interface, secure user authentication via Cognito and robust serverless serverless payment integration.
- Users can browse a dynamic catalouge, secure payments via PayPal Live API, track real-time order status with animated updates and receive automated professional HTML invoices.
- Includes a comprehensive admin dashboard for product inventory management, order workflow control (Approve/Deny) and sales analytics.
- **Tech Stack:** React/Vite frontend, Node.js AWS Lambda Serverless backend, AWS API Gateway, DynamoDB NoSQL database, Amazon Cognito for identity, AWS SES for transactional emails and CloudFront CDN.

EDUCATION

B.Sc. in Computer Science *Ruppin Academic Center (Expected Completion: 2026)*

- Focus areas: Software Development, Cyber & Communications
- Key Courses: Data Structures, Web Programming, Software Engineering, Object-Oriented Design

High School Diploma *"Dror" High School, Bnei Dror*

MILITARY SERVICE

2018 – 2021 *Commander, Israel Defense Forces (IDF)*

- Commander in combat, led a 20-soldier unit through tactical operations and training under high-pressure conditions with discipline and precision.
